Assistant Director: Steph Sweringen

Exercise Coordinator: Russ Laughlin

Research Director | Dr. Kalinda Gupta

Volunteer Coordinator | Dr. Felicity Leonard

## 2024 Emergency & Disaster Preparedness, Response, Recovery Services

1. **Veterinary input** during planning for disaster response and recovery
2. **A trained, coordinated force** of licensed professional veterinary volunteers
3. **Distributed Medical Supply Cache:** a distributed network of cache sites to access veterinary medical equipment & supplies.  
A collection of pledges from veterinary clinics and businesses throughout the state provide emergency managers and disaster response organizations with access to medical supplies with short shelf lives or temperature-sensitive storage requirements.
4. **Working Animal Care:** Support of working animal teams during training & deployment  
If you've got a working animal on your team – let us help! FRvMRC volunteers provide medical oversight during training events as well as field medical support to canine teams during a deployment or disaster.

Our volunteers provide working animal teams with classes on preventative care, emergency procedures, strengthening and conditioning routines, and more!
